- Move light furniture and items away from walls. Large, hard to move furniture pieces can remain in place.
- Remove as many items as possible off of carpets or rugs even under beds.
- Remove vent covers from HVAC systems and vacuum out the ducting.
- Remove everything from closets and place on a bed. Remove all shoes, etc. from closet floors. Covering is optional.
- Remove dresser drawers from dressers if signs of infestation noted in these areas.
- Remove everything from your kitchen except furniture and large appliances; this includes food, pots, pans, dishes and miscellaneous items. Do not place items on counter tops, refrigerator, or stove. Put items on a bed or table and cover with a sheet or blanket. All surfaces should be cleaned before treatment.
- Clear all, or as many, items from the floor area in all rooms including under kitchen/bathroom sinks.
