

Carpet Beetle Treatment

CLIENT PREPARATION FORM

For our company to provide the most effective and safe service possible, we ask you to review and complete all the necessary steps listed below.

How to Prepare for the Service

LIVING ROOM, BEDROOMS, CLOSET, ETC

Vacuum all rugs, carpet, and upholstered furniture. Discard vacuum bags immediately upon completion.

Any unlaundered wool or natural fibre clothing should be laundered or professionally cleaned. Follow all label recommendations before laundering.

Move all furniture 12 inches away from the walls. Please be sure to exercise safety first and do not attempt to move very large furniture.

After the Treatment

The treatment will remain effective only if the following steps are taken after your home is serviced:

- Avoid waxing or washing floor surfaces, especially the edges for at least three weeks after treatment, and do not steam clean carpets.
- Vacuum as usual, daily for the first week following treatment.
- DO NOT use other pest control chemicals or cleaning products anywhere near spray treatments, as this will decrease effectiveness.

Reminder

- When a spray is applied inside your residence, you and your pets will be required to vacate the premises. Typically, a 4-hour window is sufficient. However, your representative will advise you at the time of service or leave an information notice at your premises.
- Upon re-entering, please open the windows for 20-30 minutes.
- Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.
- Persons with underlying health conditions should consult their family physician if they are concerned about re-entry time.

What You Can Expect from the Treatment

- Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician.
- These have all been strategically positioned to maximize their effectiveness. All treatments are made with your safety in mind to ensure your health.
