

# Cockroach Treatment

## CLIENT PREPARATION FORM

For our company to provide the most effective, safe service possible, we ask you to review and complete all the necessary steps listed below.

## How to Prepare for the Service

### KITCHEN

- 🐛 Empty out all cupboards and food pantries.
- 🐛 Empty all your drawers of cutlery, towels, etc.
- 🐛 Clean and clear off all your counter tops.
- 🐛 Remove all foodstuffs, dishes, pots, pans, cans, boxes, etc.
- 🐛 Please remove any competing food sources /spills from all areas listed above.
- 🐛 Ensure to keep all removed items within the kitchen area covered properly to prevent cockroaches from spreading to other locations.
- 🐛 Utilize the kitchen table where possible.

### BATHROOM

- 🐛 Clear out all items from your cabinets and sink vanity drawers.

### BEDROOM CLOSETS

- 🐛 If experiencing cockroach issues or signs of activity, clear all closet floors and shelves. Clothes on hangers may be left in place.

### FURNACE ROOMS

- 🐛 Make this area accessible for the technician to properly inspect and treat.

---

## After the Treatment

---

The products applied will remain effective only if the following steps are taken after your residence is serviced:

 **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products near areas that have been treated, as this will decrease or eliminate the effectiveness of the treatments.

-  Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing the trash on a regular basis, etc.).
-  You may place back all kitchen items after the re- entry time as advised by your technician.

---

## Allergen Notification

---

Some of the products we utilize for controlling cockroaches contain allergens. Please alert your technician or superintendent where concerns over allergens exist before the treatment.

---

## Reminder

---

 When a spray is applied inside your residence, you and your pets will be required to vacate the premises. Typically, a 4-hour window is sufficient. However, your technician will advise you at the time of service or leave an information notice at your premises.

 Persons with underlying health conditions should consult their family physician if they are concerned about re-entry time.

-  Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.
-  Please be patient. The treatment will reduce cockroach activity to very low levels within approximately 2-4 weeks, leading to elimination.

---

## What You Can Expect from the Treatment

---

 Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician.

 These have all been strategically positioned to maximize their effectiveness. All treatments are made with your safety in mind to ensure your health.
