

Carpet Beetle Treatment

RESIDENT PREPARATION SHEET

For our company to provide the most effective, safe service possible, we ask you to review and complete all the necessary steps listed below.

How To Prepare For The Service

LIVING ROOM, BEDROOMS, CLOSETS ETC.

- Vacuum all rugs, carpet, and upholstered furniture. Discard vacuum bags immediately upon completion.
- Any unlaundered wool or natural fiber clothing should be laundered or professionally cleaned. Follow all label recommendations before laundering.
- Move all furniture 12 inches away from the walls. Please be sure to exercise safety first and do not attempt to move very large furniture.

Reminders Before & After The Treatment

- **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near bait placements or spray treatments, as this will decrease effectiveness.
- Avoid waxing or washing floor surfaces, especially the edges for at least three weeks after treatment, and do not steam clean carpets.
- Vacuum as usual, daily for the first week following treatment.
- When a spray is applied in your home, **you and your pets will be required to vacate for a 4-hour window** once the treatment begins.
- Upon re-entering, we recommend opening the windows for 20-30 minutes.
- Fish aquariums may be left onsite; however, they should be covered, and air filters must be disconnected.
- Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician.
- These have all been strategically positioned to maximize their effectiveness.
