

# Cluster, House, or Blow Fly Treatment RESIDENT PREPARATION SHEET

For our company to provide the most effective, safe service possible, we ask you to review and complete all the necessary steps listed below.

## How To Prepare For The Service

### INTERIOR & EXTERIOR

- 🐛 Allow safe access to the attic door for your technician.
- 🐛 Have the blinds up or removed.
- 🐛 Have drapes open or removed.
- 🐛 Have nothing sitting on the windowsills (such as picture frames).
- 🐛 Move furniture away from the window if it sits in front or close to it.
- 🐛 Ensure that all window and door screens fit properly and have no cracks or holes.
- 🐛 Weather strip windows, doors, light fixtures, and wall plates.

## Reminders Before & After The Treatment

- 🐛 **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near bait placements or spray treatments, as this will decrease effectiveness.
- 🐛 Vacuum all dead flies and discard vacuum bag(s) immediately upon completion.
- 🐛 When a spray is applied in your home, **you and your pets will be required to vacate for a 4-hour window** once the treatment begins. Your Technician will advise you at the time of service or leave an information notice at your premises.
- 🐛 Upon re-entering, we recommend opening the windows for 20-30 minutes.
- 🐛 Fish aquariums may be left onsite; however, they should be covered, and air filters disconnected.
- 🐛 A complete interior and exterior inspection will be completed to locate the sources of cluster or blow fly activity.
- 🐛 Your technician will use a number of treatment methods depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied.
