

Rodent Treatment

RESIDENT PREPARATION SHEET

For our company to provide the most effective, safe service possible, we ask you to review and complete all the necessary steps listed below.

Prep Checklist

INTERIOR & EXTERIOR OF HOME

- 🐭 PLEASE DO NOT remove rodent dropping from any areas before the inspection, this will allow the technician to determine activity, population etc.
- 🐭 Follow the technician's recommendations for any repairs needed to close entry points.
- 🐭 Empty only the kitchen cupboards and drawers of all dishes, pots, pans, cans, food, etc.
- 🐭 Remove any items from the top of the refrigerator and stove.
- 🐭 Remove any obstacles near or around the basement or crawlspace access door, electrical panels, furnace units, and air exchange units.
- 🐭 Clear out all items from your bathroom cabinets and drawers.
- 🐭 Remove any obstacles near or around the laundry machines, around or leading to the attic access door and on the ground level near or around the inside walls of the garage. The garage should also be free of any vehicle prior to the pest inspection.
- 🐭 Please make exterior perimeter accessible for our technician to inspect for entry points.

Reminders Before & After The Treatment

- 🐭 DO NOT move any of the stations or traps.
- 🐭 DO NOT use any other rodent control products (this can work against our control measures).
- 🐭 Follow the technician's recommendations for any repairs needed to close entry points.
- 🐭 Remove all competing food sources (this means keeping all pet foods in tightly sealed containers, cleaning up spills as they occur, removing the trash regularly, etc.).
- 🐭 Some of the products we may utilize during our treatment may contain allergens such as wheat, soy, peanuts, and shellfish. Alert your technician of any if allergens exist before the treatment.
- 🐭 You or your pets don't need to leave your home before, during, or after the treatment. However, children and pets must not be in the same room/area during the treatment.
- 🐭 Please be patient. Depending on the infestation level and species of rodent, effective control may take weeks.
- 🐭 Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician. These have all been strategically positioned to maximize their effectiveness.
