

# Silverfish Treatment

## RESIDENT PREPARATION SHEET

For our company to provide the most effective, safe service possible, we ask you to review and complete all the necessary steps listed below.

### Prep Checklist

For areas where silverfish have been observed:

- Please make areas accessible for our technician to treat if applicable by moving all furniture 12 inches away from the walls. Please be sure to exercise safety first and do not attempt to move large furniture.
- Clear all closet floors and shelves of shoes and other items. Clothing on hangers may be left in place.
- Clear out all items from your bathroom cabinets and drawers.

### Reminders Before & After The Treatment

- DO NOT self-treat before or after the service.
- DO NOT use other pest control chemicals (powders or sprays) or cleaning products near areas that have been treated, as this will decrease the effectiveness of the treatments.
- Reducing relative humidity in your home below 50% will assist in preventing these pests from occurring.
- Remove all competing food sources like newsprint and cardboard boxes.
- You may place back all items after the re-entry time as advised by your technician.
- When a spray is applied inside your residence, **you and your pets will be required to vacate the premises for a 4-hour window**. Your technician will advise you at the time of service or leave an information notice at your premises.
- Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.
- Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician. The method of treatment will determine the required vacate time.
- Depending on the level of the activity, follow up services may be required and will be coordinated by your Community or Property Manager with A&A Pest Control.
- Typically, the first follow up service will occur approximately 2-3 weeks after the initial treatment.
- Contact your Community or Property Manager if further assistance is needed.
