

Spider Treatment

RESIDENT PREPARATION SHEET

For our company to provide the most effective, safe service possible, we ask you to review and complete all the necessary steps listed below.

Prep Checklist

INTERIOR & EXTERIOR OF HOME

- Applies to all areas of concern or where spiders have been observed
- Move all interior furniture 12 inches away from the walls to allow for baseboard treatment.
- Clear all closet floors and shelves of shoes and other items. Clothing on hangers may be left in place.
- Please make exterior areas accessible for our technician to treat if applicable by moving all planters, patio furniture, toys, recreational equipment etc. 12 inches away from the outside walls. Please be sure to exercise safety first and do not attempt to move large furniture.
- Remove items and debris from moist dark areas such as porches, in window wells, around rock gardens etc. to allow access for the Technician.

Reminders Before & After The Treatment

- DO NOT self-treat before or after the service.
- DO NOT use other pest control chemicals (powders or sprays) or cleaning products near areas that have been treated, as this will decrease the effectiveness of the treatments.
- Eliminate the leaf litter from the exterior perimeter.
- You may place back all items after the re-entry time as advised by your technician.
- Remove any insect remains and vacuum appropriately.
- When a spray is applied inside your residence, **you and your pets will be required to vacate the premises for a 4-hour window**. Your technician will advise you at the time of service or leave an information notice at your premises.
- Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.
- Your technician will use a number of methods to control the pest depending on each unique situation. Liquid spray will be used and is the most effective treatment to take control.
- While our Technicians will do their best to avoid product being applied on windows during the overhead application, some treatment may leave streaks on the outside windows; refrain from cleaning the windowsills but the glass can be cleaned with a damp cloth & warm water. Please be sure to exercise safety first and use rubber gloves when cleaning the windows.
